A L L

An information transacting method is provided. The information transacting method includes: receiving information from an information server controlled by the provider; extracting information from the information received from the information server; and transmitting the information extracted from the information received from the information server to the customer. The information extracted from the information received from the information server is constructed by the provider. A tool is used to extract information from the original information received from the information server and sent to the customer. The information extracted from the original information is maintained in the tool-added information.

$\frac{d}{dt} \left(\frac{\partial L}{\partial \dot{x}} \right) = \frac{\partial L}{\partial x}$
